

SAFETY RULES FOR AMUSEMENT RIDE OPERATORS

- 1** Be sure you understand the use and functions of controls, signal systems and safety devices.
- 2** Be familiar with the ride manufacturer's manual.
- 3** Inspect and test the entire ride before each operating period.
- 4** Stop the ride when any unusual noise or condition develops. Do not operate the ride until your supervisor has inspected and repaired the ride.
- 5** Remain in control of the ride at all times. Never allow unauthorized persons to operate the ride.
- 6** Do not operate the ride at unsafe speeds or load it beyond its rated capacity.
- 7** Be alert when the ride is operating for an emergency stop.
- 8** Be aware of changing weather conditions. Do not operate the ride during high winds or electrical storms.
- 9** Persons that appear to be ill or under the influence of alcohol or drugs should not be allowed on the ride.
- 10** Be sure the riders fit the ride. Children should meet minimum size requirements. Adults must fit comfortably into the seats.
- 11** Safety belts. Lap chains or safety bars must be properly secured before starting the ride.
- 12** Patrons waiting for the next ride must be kept outside of fence and away from the moving ride.
- 13** Ensure patrons remain seated until the ride comes to a complete stop.
- 14** Know the location of the closet first aid station and fire extinguisher.
- 15** Any incident no matter how small must be reported to the office at once.
